DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-11, in the reply filed on 1/13/05 is acknowledged.

Claims 12-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Groenenberg (US 6,277,059).

Groenenberg discloses a folding machine comprising housing 2 with a adjustable fold plates 30 and 31 for providing alignment for the folding procedure with adjustment bar 50; input table; stacking table 8; stacking arm 43 with rollers 42; stacking arm 43 is part of adjustable transport device 33 which is linked to adjustable plates 31; see figures 2-4 and column 4, lines 2-15.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3721

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 11 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Groenenberg (US 6,277,059).

Groenenberg does not directly disclose a removable plate enclosing a processing area of the housing however it is well known that such devices as the printer apparatus and its housing 2 would inherently contain doors/lids/openings for accessing the components therein which could be removed in a two step process ie. opening and removing/disconnecting. The examiner takes OFFICIAL NOTICE that at least it would have been obvious to one of ordinary skill in the art to include a removable (by a two step process) plate in the housing for accessing the inner components/workings.

Allowable Subject Matter

6. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
